Travelling allowance for the tax year ending 2023

Rates per kilometre, which may be used in determining the allowable deduction for business travel against an allowance or advance where actual costs are not claimed, are determined using the table published on the SARS website www.sars.gov.za, under Legal Counsel/Secondary Legislation/Income Tax Notices/Fixing of rate per kilometre in respect of motor vehicles.

Note:

80% of the travelling allowance must be included in the employee's remuneration for the purposes of calculating PAYE. The percentage is reduced to 20% if the employer is satisfied that at least 80% of the use of the motor vehicle for the tax year will be for business purposes.

No fuel cost may be claimed if the employee has not borne the full cost of fuel used in the vehicle, and no maintenance cost may be claimed if the employee has not borne the full cost of maintaining the vehicle (e.g. if the vehicle is covered by a maintenance plan).

The fixed cost must be reduced on a pro-rata basis if the vehicle is used for business purposes for less than a full year.

The actual distance travelled during a tax year, and the distance travelled for business purposes substantiated by a log book, are used to determine the costs which may be claimed against a travelling allowance.

Alternatively:

Where an allowance or advance is based on the actual distance travelled by the employee for business purposes, no tax is payable on an allowance paid by an employer to an employee, up to the rate published on the SARS website www.sars.gov.za, under Legal Counsel/Secondary Legislation/Income Tax Notices/Fixing of rate per kilometre in respect of motor vehicles, regardless of the value of the vehicle.

However, this alternative is not available if other compensation in the form of an allowance or reimbursement (other than for parking or toll fees) is received from the employer in respect of the vehicle.

Right of use of motor vehicle

When an employee receives the right to use a motor vehicle the following provisions apply:

- Where the vehicle is owned by the employer, the taxable value is 3,5% of the determined value (Vehicles purchased before 1 March 2015: The cash cost including VAT; Vehicles purchased on/after 1 March 2015: Retail market value) per month of each vehicle. Where the vehicle is the subject of a maintenance plan at the time that the employer acquired the vehicle the taxable value is 3,25% of the determined value.
- Where the vehicle is rented by the employer, the monthly taxable value is equal to the actual costs incurred by the employer under the lease (rental and insurance for example) as well as the cost of fuel for the vehicle.
- 80% of the fringe benefit must be included in the employee's remuneration for the purposes of calculating PAYE. The percentage is reduced to 20% if the employer is satisfied that at least 80% of the use of the motor vehicle for the tax year will be for business purposes.
- On assessment the fringe benefit for the tax year is reduced by the ratio of the distance travelled for business purposes substantiated by a log book divided by the actual distance travelled during the tax year.
- On assessment further relief is available for the cost of licence, insurance, maintenance and fuel for private travel if the full cost thereof has been borne by the employee and if the distance travelled for private purposes is substantiated by a log book.

Subsistence allowances and advances

Where an advance or allowance is received by an employee for meals and other incidental costs, he / she can deduct either:

- The amount actually spent (limited to the advance or allowance), or
- For a day trip where employee is not spending at least one night away from his/her normal place of residence, an amount not exceeding R152.
- The daily amounts set out in the table below where the employee is obliged to spend at least one night away from his/her usual place of residence on business. When the deemed amounts are used, the employee does not have to produce proof of the amounts spent and the allowance is not subject to employees' tax.

Cost	2021	2022	2023
Meals and incidental cost in South Africa	R452	R452	R493
Incidental cost only in South Africa	R139	R139	R152
Daily amount for travel outside South Africa	As per SARS website		

Residential accommodation

The fringe benefit to be included in gross income is calculated in the following different ways, depending on the circumstances:

- Using a formula less the amount paid by the employee
- Using the lower of a formula or the cost borne by the employer less the amount paid by the employee
- When holiday accommodation has been provided, the fringe benefit will be the rental cost of the employer or prevailing market rate per day depending on the circumstances

Low-cost housing

No fringe benefit will arise if an employee acquires a house from their employers at a discount (i.e. at a price below market value) if the following requirements are met:

- The employee does not earn more than R250 000 in salary during the year of assessment in which the acquisition took place
- The market value of the property that is acquired may not exceed R450 000, and
- The employee may not be a connected person in relation to the employer

Interest-free or low interest loans to finance the above stated low cost housing will not be regarded as a fringe benefit if the loan also does not exceed R450 000.

Interest-free or low-interest loans

The difference between interest charged at the official rate and the actual amount of interest charged on employee loans, is to be included in gross income.

Short-term loans granted at irregular intervals to employees are, however, exempted to the extent that it does not exceed R3 000.

Bursaries

Bursaries are exempt from tax where:

- the bursary is granted to an employee who agrees to reimburse the employer for the bursary if the employee fails to complete his studies for reasons other than death, ill-health or injury, or
- the bursary is granted to a relative of an employee that earns less than R600 000 per annum and to the extent that the bursary does not exceed R20 000 (R30 000 for disabled relative) grade R to matric and R60 000 (R90 000 for disabled relative) for further education. The bursary cannot be as a result of any salary deduction taken by the employee.

Medical fund contributions

Medical fund contributions paid on behalf of an employee is a fringe benefit. As a result the employee is deemed to have made the payment to the scheme and may get a tax credit.

DEDUCTIONS

Contributions to pension, provident and retirement annuity funds

With effect 1 March 2016 the tax deduction for contributions made to pension funds, provident funds and retirement annuity funds is significantly amended. Please refer to previous year's tax guides for the tax treatment before 1 March 2016. From 1 March 2016 onwards, the tax deduction calculation for the three different funds, pension, provident and retirement annuity funds will be identical. The deduction will be limited to:

The above deduction is however limited to taxable income before this deduction and before any taxable capital gain.

Excess contributions not allowed as deductions are carried forward to the following year of assessment. Contributions made by employers on behalf of employees would be a taxable fringe benefit in the hands of the employees but will also be regarded as a contribution made by the employee, therefore deductible in the hands of the employee subject to the above limitations.

Medical and disability expenses

All taxpayers are entitled to a monthly "tax rebate" (i.e. credit) in respect of any medical scheme contributions made for the benefit of themselves and their dependants as follows:

	2021	2022	2023
Taxpayer	R319	R332	R347
First dependant	R319	R332	R347
Per additional dependant	R215	R224	R234

For additional (e.g. out-of-pocket) medical expenses incurred by individual taxpayers, a tax rebate is available as follows:

- Where the taxpayer is 65 and older or where the taxpayer, taxpayer's spouse or child is a person with a disability: 33.3% of the value of the amount by which the aggregate of the medical scheme fees that exceed $3 \times$ the standard medical scheme credits, and all qualifying medical expenses (other than medical scheme contributions)
- Other taxpayers: 25% of the value of the amount by which the aggregate of the medical scheme fees that exceed $4 \times$ the standard medical scheme credits, and all qualifying medical expenses (other than medical scheme contributions), exceed 7.5% of the taxpayer's taxable income (excluding any retirement fund lump sum benefit, retirement fund lump sum withdrawal benefit and severance benefit including capital gains)

HOME OFFICE COST

Employees:

For an employee to claim home office cost deduction, the home office must be specifically equipped for the purpose of the employee's trade, regularly and exclusively used for such purposes, and:

- if the remuneration earned is mainly in the form of commission or other similar variable payments, then home office cost can be deducted if the duties of such employee are mainly performed otherwise than in an office provided by his or her employer, or
- If the remuneration earned is not mainly in the form of commission or other similar variable payments, then home office cost can be deducted if the duties of such employee are mainly performed in such home office

Independent contractors:

Taxpayer not earning income from employment can deduct home office cost incurred in the production of income from a trade being carried on that is not of a capital nature. However, private and domestic expenditure cannot be deducted.

- tax determined by applying the tax table to the aggregate of benefits mentioned above excluding retirement lump sums and severance benefits received for the year

PROVISIONAL TAX

Provisional tax is payable by all taxpayers except natural persons if:

- That person does not derive any income from the carrying on of any business, and
- Taxable income of that person for the year of assessment will not exceed the tax threshold, or
- The taxable income of that person for the year of assessment which is derived from interest, foreign dividends and rental will not exceed R30 000, or
- any person that derives any remuneration from an employer that is registered for employees tax.

First provisional payment

The first payment is due six months before the end of the tax year. The payment must be based on the basic amount or a lower estimate approved by SARS.

Second provisional payment

The second payment is due on the last day of the tax year. The payment must be based on an estimate of the taxable income for the year. The following two tier model is in force:

- Taxable income less than R1 million – the estimate must be equal to the lesser of the basic amount or 90% of the actual taxable income
- Taxable income greater than R1 million – the estimate must be equal to at least 80% of the actual taxable income

Third Provisional payment

The third provisional payment is due six months after a taxpayer's year-end. In the case of a taxpayer with a February year-end, the "top-up" payment can be made by the end of September of every year.

Basic amount

The basic amount is computed as the taxable income (excluding capital gains and retirement fund lump sum benefits) of the latest preceding year of assessment issued by SARS more than 14 days before submission of the provisional tax return. The taxable income must be increased by 8% per annum if that assessment is more than 18 months old.

General provisions

Any Employee's remuneration is subject to monthly deductions referred to as **PAYE**. Apart from salaries, commission etc. the following income/payments are also subject to **PAYE**:

- 80% of any travel allowance reduced to 20% if the employer is satisfied that the employee travels at least 80% of the time for business
- The portion of any reimbursive travel allowance that exceeds the tax-free limit per kilometer
- Remuneration paid to labour brokers/personal service providers
- Annuities from Annuity Funds
- Payments to Personal Service Providers (PSP's)

See PSP process flow for more detail on entities that will be considered PSP's. A PSP is subject to employees' tax at the rate of 28%* if it is a company and 45% if it is a trust. Expenses to be deducted by a PSP are also limited.

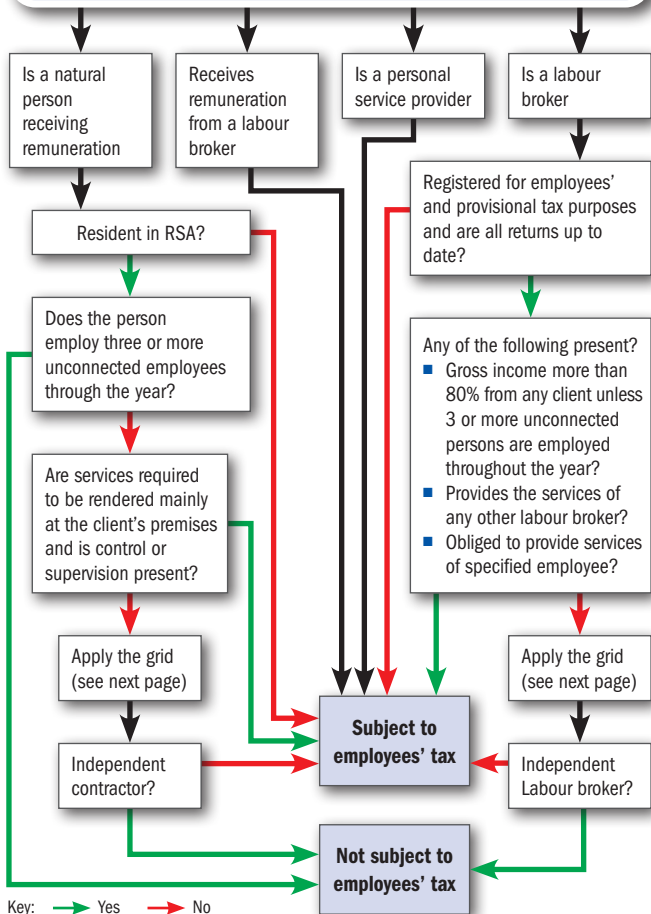

Directors of companies are subject to PAYE according to the same rules applying to other employees.

Part-time, casual and temporary employees are subject to PAYE at a flat rate of 25%.

Variable remuneration, such as overtime pay, bonus, commission, night shift and standby allowance or reimbursement of any expenditure accrue to the employee only on the date that it is paid. The employer is also only deemed to have incurred the variable remuneration on the date of payment.

*For tax years ending on or after 31 March 2023 the tax rate is reduced to 27%

Normal Trust	45%	80%
Special Trust	Same as those applicable to natural persons, except that the rebates and interest exemptions do not apply	40%

Note: A special trust is a trust created solely for the benefit of someone who suffers from a disability that prevents such person from earning sufficient income for their maintenance or from managing their own financial affairs. A special trust can also be created by way of a testamentary trust whereby relatives of the testator who are alive on the date of death are the beneficiaries. In order to qualify as a special trust, the youngest of the beneficiaries must, on the last day of the year of assessment of that trust, be under the age of 18 years.

Interest-free and low-interest loans to a trust

With effect 1 March 2017 loans made to a trust by

- a natural person, or
- at the instance of that person, a company in relation to which that person is a connected person, and where that person or company is a connected person in relation to the trust

the difference between the amount of interest incurred by the trust (if any, otherwise nil) and the interest that would have been incurred by that trust at the official rate of interest will be a continuing, annual donation for purposes of donations tax, made by the lender on the last day of the year of assessment of the trust

Loans by a natural person or a company to a company is also subject to donation tax on the same basis if 20% or more of the shares of the company is held directly or indirectly by a trust (or beneficiary of trust or spouse of beneficiary). Preference shares issued by a company are also regarded as loans for this donation tax calculation.

The following will be specifically excluded from the above donation provisions:

- special trusts that are created solely for the benefit of disabled persons
- trusts that fall under public benefit organisations
- vesting trusts (in respect of which the vesting rights and contributions of the beneficiaries are clearly established)
- loans used by the trusts to fund the acquisition of a primary residence
- loans that are subject to transfer pricing provisions
- loans provided to the trust in terms of a sharia-compliant financing arrangement, or
- loans that are subject to dividends tax
- loans to employee share purchase trusts

The lender may utilise the annual donations tax exemption of R100 000 (or remaining portion if applicable) against this deemed donation.

No deduction, loss, allowance or capital loss may be claimed for the reduction, waiver or other disposal of such a loan, advance or credit by the lender.

Other anti-avoidance provisions

Anti-avoidance provisions exist to combat the use of trusts for income splitting and tax avoidance schemes. These provisions will normally be applicable where income accrues to a person other than the donor as a result of a donation, settlement or other disposition made (i.e. interest free loans). These provisions may apply where income accrues to the following persons:

- The donor's spouse
- A minor child of the donor
- The trust to whom the donation, settlement or other disposition has been made
- Non-residents

The result of the anti-avoidance provisions are that the income that accrues to the person's mentioned above are deemed to be the income of the donor.

Turnover tax for micro businesses is a simplified turnover-based tax system substituting income tax and Capital Gains Tax. A micro business may voluntarily register for VAT. Turnover tax is an elective tax applicable to sole proprietors, partnerships and companies that meet certain criteria and have a turnover of less than R1 million per year.

A micro business may only voluntarily exit the turnover tax system before the beginning of a year of assessment.

PUBLIC BENEFIT ORGANISATIONS (PBO)

In order to qualify as a PBO an entity needs to have as its main object the carrying out of one or more public benefit activities in a non-profit manner. These activities need to qualify in one or more of the following categories:

- **welfare and humanitarian**
- **health care**
- **land and housing**
- **education and development**
- **conservation, environment and animal welfare**
- religion, belief or philosophy
- cultural
- research and consumer rights
- sport
- providing funds, assets or other resources
- support services to other PBO's
- hosting certain international events

Note: Only the activities in bold qualify for section 18A status.

For more information on how to register a PBO with SARS and the specific requirements refer to the SARS website:

<https://www.sars.gov.za/ClientSegments/Businesses/TEO/Pages/default.aspx>

Donations to approved public benefit organisations are exempt from donations tax and deductible for income tax as follows if section 18A status has been approved:

- Company donations limited to 10% of taxable income
- Individual donations limited to 10% of taxable income excluding any retirement fund lump sum benefits
- Any excess above the 10% cap above may be rolled over to subsequent years

DIVIDENDS TAX

Dividends tax is a tax levied on the shareholder at a rate of 20% on dividends paid. However, where a dividend in specie is paid, dividends tax is a tax levied on the company declaring the dividend. Dividends tax is normally withheld by the company paying the dividend and is payable at the end of the month following the month in which the dividend was paid. The repayment of contributed tax capital by a company would be regarded as a return of capital and not subject to dividends tax.

Dividends tax exemptions

A dividend is exempt from dividends tax if the dividend is not a dividend in specie and the beneficial owner is:

- A SA company
- The Government and various quasi government institutions
- Public Benefit Organisations
- Environmental rehabilitation trusts
- Pension, provident, similar funds and medical schemes
- A shareholder in a registered micro business (only the first R200 000 of dividends paid during a particular year of assessment)
- A non-resident and the dividend is paid by a South African Listed non-resident company

Where the dividend comprises of a dividend in specie, the following exemptions are applicable:

- The same exemptions as above subject to the beneficial owner submitting a declaration and written undertaking
- Where the beneficial owner forms part of the same group of companies

Loans to connected persons

Dividends tax will be calculated as 20% of the difference between the official rate of interest in respect of the debt and the amount of interest payable in respect of the debt. Where the official rate of interest on the debt does not exceed the actual interest payable on the debt, the value of the deemed dividend is deemed to be nil. Dividends tax on a loan to a connected person is regarded as a *dividend in specie* and as such the liability of the company and not the shareholder.

The First schedule of the Income Tax Act regulates farming taxes. The most important sections are:

Valuation of livestock and produce

Only livestock and produce need to be brought into account at year-end and not consumables like seed, fertiliser, fuel etc. Produce is valued at the lowest of average cost of production or market value. Livestock can be valued at standard values or the farmer may elect his own values which may not differ more than 20% of standard values (once a value has chosen, it must be used consistently).

Purchases of livestock cannot create a loss because of using standard values. This gross loss must be carried forward to the next year. See www.sars.gov.za for the standard values.

Capital development expenditure

The following capital development expenditure may be deducted in full: Eradication of noxious plants, alien invasive plants and prevention of soil erosion.

The following capital development expenditure is restricted to taxable income from farming: dipping tanks, dams, irrigation schemes, boreholes and pumping plants, fences, additions/erection of/extensions and improvements to farm buildings, costs of establishing the area for and the planting of trees, shrubs and perennial plants, building of roads and bridges for farming operations, carrying of electric power from main power lines to farm machinery and equipment.

Special depreciation allowance

Machinery, implements, utensils and articles for farming purposes are written off over three years on a 50:30:20 basis.

Rating formula

Because a farmer's income fluctuates from year to year, an individual farmer may elect to be taxed in accordance with a rating formula in terms of special provisions.

Persons subject to CGT

CGT is payable on capital gains that arise by the following persons:

- Residents are subject to CGT on all assets including overseas assets
- Non-residents are subject to CGT on immovable property or any right or interest in a property situated in South Africa and any asset of a permanent establishment through which a trade is carried on in South Africa (SA)

Note: Any right or interest in a property includes a direct or indirect interest of at least 20% held alone or together with any connected person in the equity share capital of a company, where at least 80% of the value of the net assets of the company is, at the time of the disposal, attributable to immovable property in SA.

Exclusions

The following are the main exclusions from CGT:

- Primary residences with capital gains up to R2 million
- Personal use assets
- Retirement benefits
- Long-term assurance
- Small business assets with capital gains up to R1.8 million (applicable when a person is over the age of 55 where the maximum market value of the small business assets does not exceed R10 million)
- Annual exclusion for natural persons: R40 000
- Annual exclusion on death for natural persons: R300 000

Calculation and inclusion rates

A capital gain or loss is calculated separately in respect of each asset disposed. Once determined, gains or losses are combined for that year of assessment and if it is:

- an assessed capital loss, it is carried forward to the following year, or
- a net capital gain, it is multiplied by the inclusion rate and included in taxable income

The inclusion rates are as follows:

PERSON	2021	2022	2023
Natural person and special trust	40%	40%	40%
Company	80%	80%	80%
Trust	80%	80%	80%

Withholding tax – prepayment CGT

The purchaser must withhold CGT on the purchase price where assets are purchased from a non-resident except where the amount payable by the purchaser is less than R2 million. This withholding tax is not a final tax and is merely a prepayment of the expected CGT. The following withholding tax rates are applicable and are based on the proceeds on disposal:

NON-RESIDENT SELLER	2021	2022	2023
Natural person	7.5%	7.5%	7.5%
Company	10%	10%	10%
Trust	15%	15%	15%

WITHHOLDING TAX (OTHER) – FINAL

Royalties

A withholding tax of 15% is payable when royalties from a South African source are paid to non-residents, subject to certain exemptions.

Interest

A withholding tax of 15% is payable when interest from a South African source are paid to non-residents, subject to certain exemptions.

Foreign Entertainers and sportpersons

A withholding tax of 15% on payments to foreign entertainers and sportpersons for activities in South Africa.

VALUE-ADDED TAX (VAT)

The VAT system comprises of three types of supplies:

- Standard-rated supplies – supplies of goods and services subject to the VAT rate in force at the time of supply. With effect 1 April 2018 the VAT rate was increased from 14% to 15%
- Exempt supplies – supplies of certain services not subject to VAT. Vendors making exempt supplies are not entitled to input VAT credits
- Zero-rated supplies – supplies of certain goods or services subject to VAT at zero percent. Vendors making zero-rated supplies are entitled to input VAT credits

Key features

- Enterprises with a turnover of less than R1 000 000 in any period of 12 months are not obliged to register for VAT
- Enterprises with a turnover of less than R50 000 in any period of 12 months are not permitted to register for VAT
- VAT returns are generally submitted on a two monthly basis unless turnover in any period of 12 months exceeds R30 million, in which case returns are submitted monthly
- Farmers may submit VAT returns on a six monthly basis as long as their turnover does not exceed R1.5 million and property letting companies and trusts may, subject to certain requirements, submit annual VAT returns
- Vendors may reclaim the VAT element on expenditure incurred for the purpose of making taxable VAT supplies except on, entertainment, excluding qualifying subsistence, passenger vehicles (including hiring) and club subscriptions
- Input tax credits may not be claimed on expenditure relating to exempt supplies
- Input tax credits may only be claimed upon receipt of a valid tax invoice
- In order to be a valid tax invoice the name, address and VAT registration number of the recipient and supplier must appear on tax invoices where the VAT inclusive total exceeds R5 000
- A deposit is not subject to output VAT until the supplier applies the deposit as consideration for payment

*a building not exceeding cost of R300 000 or an apartment not exceeding a cost of R350 000

Residents are taxed on their worldwide income, subject to certain exclusions.

Definition of resident

Natural Person (see flowchart further in this guide)

- any natural person who is ordinarily resident in South Africa, or
- any natural person who is not ordinarily resident in South Africa but who:
 - ◆ is physically present in South Africa for a period exceeding 91 days in aggregate during the current year of assessment and for a period exceeding 91 days in aggregate during each of the prior five years of assessment; and was physically present in South Africa for a period exceeding 915 days in aggregate during the previous five years of assessments.
 - ◆ Where a person has been outside of South Africa for a continuous period of at least 330 full days after he ceases to be physically present in South Africa, he will be deemed to not have been resident from then.
 - ◆ South African resident employees who render services for any employer outside South Africa for a period which in aggregate exceeds 183 full days commencing on or ending during a period of assessment, and for a continuous period exceeding 60 full days during such 183 day period, will not be liable for income tax on their remuneration for that period. From 1 March 2020 this exemption will be limited to R1.25m per year.

Companies and Trusts

A company and Trust will be considered to be resident for tax purposes if it is incorporated, established, formed or has its place of effective management in South Africa.

Controlled Foreign Companies (CFC)

A Controlled Foreign Company (CFC) means any foreign company where more than 50% of the total participation rights or voting rights are directly or indirectly exercisable by one or more residents. South African residents must impute all

income of a CFC in the same ratio as the participation rights of the resident in such a CFC, subject to a number of exclusions. Net income of the CFC is defined as the CFC's taxable income determined as if the CFC is a South African taxpayer.

Foreign dividends (including deemed dividends)

Foreign Dividends received from a non-resident company are taxable.

Foreign dividends are, however, exempt as follows:

- If received by a resident who holds at least 10% of the equity shares in the foreign company
- The shareholder is a company which is in the same country as the foreign company paying the dividend
- If declared by a company listed on the SA stock exchange
- If paid out of the profits of a foreign company if the profits of the foreign company have been included in the South African shareholder's income in terms of the CFC provisions

Where a foreign dividend is not exempt in terms of the provisions above the following part of a foreign dividend will be exempt from tax:

- Individuals and trusts: Subject to a maximum effective tax rate of 20%
- Companies: Subject to an effective tax rate of 20%

No deduction will be granted for any expenditure incurred in the production of income in the form of foreign dividends.

Foreign tax credits

Residents are allowed to deduct all foreign taxes paid in respect of foreign source income from the tax payable in South Africa on such foreign income. Any excess credits may be carried forward.

Where foreign tax is withheld on South African source income, the taxpayer can claim a deduction against income.

Non-residents may invest in the Republic, provided that suitable documentary evidence is received in order to ensure that such transactions are concluded at arm's length, at fair market-related prices, and are financed in an approved manner.

Financial assistance in South Africa

- Emigrants: local financial assistance made available to emigrants is subject to the 1:1 ratio.
- Non-residents: authorised dealers may grant or authorise local financial assistance facilities to non-residents in respect of bona fide foreign direct investments into South Africa without restrictions. Where the funds are required for the acquisition of residential property or other financial transactions, the 1:1 ratio will apply.
- Affected persons (i.e. where non-residents directly or indirectly own 75% or more of an entity): there is no restriction on the amount that could be borrowed locally in instances where an affected person wishes to borrow locally to finance a foreign direct investment into South Africa or for domestic working capital requirements. Wholly non-resident owned subsidiaries may borrow locally up to 100% of the total shareholders' investment, in respect of the acquisition of residential property and or other financial transactions. The effect of local participation in non-resident controlled entities is to make the abovementioned norms more liberal the greater the local participation, i.e. the ability to borrow locally increases. This is based on a formula.

Loans from non-resident shareholders to residents

Applications for proposed borrowing abroad by residents must be referred to the Financial Surveillance Department for approval.

Capital transactions

Proceeds from the sale of assets in South Africa, may be remitted abroad. Proceeds on the sale of assets by emigrants will be subject to the blocked account provisions.

Dividend payments to non-residents

Dividends declared by companies are remittable to non-resident shareholders in proportion to percentage shareholdings, subject to certain restrictions if the dividend is declared by an affected person who has local financial assistance. An emigrant shareholder will be entitled to dividends declared out of income earned from normal trading activities after the date of emigration. Non-listed companies have additional requirements to be met in order to transfer such dividends. Dividends declared out of capital gains, or out of income earned from normal trading activities prior to the date of emigration, remain subject to the blocked account provisions.

Director fee payments to non-residents

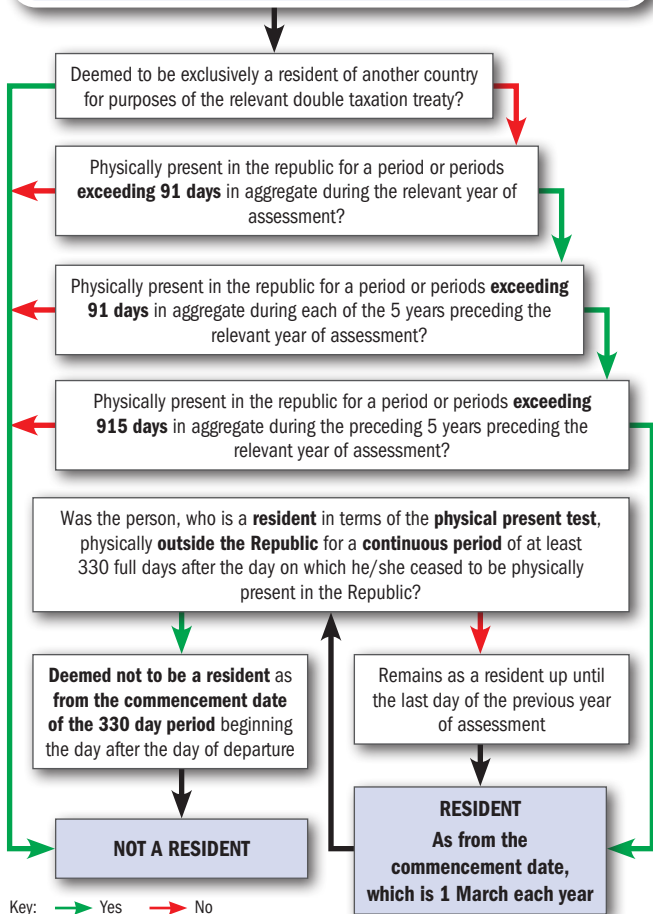

Authorised dealers may transfer director's fees to non-resident directors permanently domiciled outside South Africa, provided the application is accompanied by a copy of the resolution of the board of the remitting company, confirming the amount to be paid to the beneficiary.

Ceasing to be a resident

When a person ceases to be a resident, certain tax consequences are triggered. A trust or natural person that ceases to be a resident must be treated as having disposed of all their assets for market value immediately before they ceased to be a resident.

A company that ceases to be a resident will also be treated as having disposed of all its assets for market value immediately before it ceased to be a resident. In addition the company will be deemed to have paid a dividend on the difference between the market value of all the shares of the company and the contributed tax capital of the company.

Foreign capital investments

Resident individuals who are over 18 and taxpayers in good standing are permitted to invest abroad. The current limit is R10 000 000 per person per calendar year. Applications by individuals to invest in fixed property and other investments will also be considered in addition to the foreign capital allowance.

Single discretionary allowance (in addition to foreign capital allowance)

Residents over the age of 18 years may be permitted a single allowance within an overall limit of R1 000 000 per individual per calendar year, without the requirement to obtain a Tax Clearance Certificate, to cover the following discretionary allowances (w.e.f. 1/4/15 to cover use for any legal purpose):

- monetary gifts and loans
- donations to missionaries
- maintenance transfers
- travel allowance (minors entitled to an annual allowance of R200 000)
- study allowance

Study allowances

The direct costs of study may be transferred directly to the institution. Should a spouse accompany a student, a discretionary allowance may be accorded to the spouse. Household and personal effects, including jewellery (but excluding motor vehicles), up to a value of R200 000 per student may be exported.

Emigration limits

Foreign Capital Allowance (reduced by foreign capital investments)

Single Person – R10 000 000

Family Unit – R20 000 000

Household & Personal Effects, Motor Vehicles, Stamps, Coins & Kruger Rands
R2 million can be transferred.

ESTATE DUTY

The general rule is that if the taxpayer is ordinarily resident in the Republic at the time of death, all of his assets (including deemed property), wherever they are situated, will be included in the gross value of his estate for the determination of duty payable thereon. Estate duty is levied at 20% on the first R30 million of the dutiable estate. Estate duty will be levied at 25% on the dutiable estate in excess of R30 million.

Deemed property includes insurance policies on the life of the deceased, claims in terms of the matrimonial property act as well as property that the deceased was competent to dispose of immediately prior to his death.

The most important deductions are:

- Debts due at date of death
- Bequests to various charities
- Bequests to a surviving spouse

The Act allows for a R3.5m estate duty abatement. This abatement could rollover from the deceased to a surviving spouse, so that the surviving spouse can use a R7m abatement on death. The portability of the deduction will apply to the extent that the first dying spouse did not use the whole abatement.

There is relief from Estate Duty in the case of the same property being included in the estates of taxpayers dying within ten years of each other. The deduction is calculated on a sliding scale varying from 100% where the taxpayers die within two years of each other and 20% where the deaths are within eight to ten years of each other.

Executor's remuneration

An executor is entitled to the following remuneration:

- The remuneration fixed by deceased in the will, or
- 3.5% of gross assets
- 6% on income accrued and collected from date of death

Executor's remuneration is subject to VAT where the executor is registered as a vendor.

DONATIONS TAX

Donations Tax is payable by any South African resident. The donations tax provisions do not apply to non-residents even if they donate South African assets. Donations tax is payable on the value of any gratuitous disposal of property (including the disposal of property for inadequate consideration) and the renunciation of rights.

Principal exemptions

- Donations between spouses
- Donations to charitable, ecclesiastical and educational institutions, and certain public bodies in the Republic of South Africa (limited to certain thresholds)
- Donations by natural persons not exceeding R100 000 per year
- The donation of assets situated outside the Republic, subject to certain conditions
- Donations by companies not considered to be public companies up to R10 000 per annum
- Donations where the donee will not benefit until the death of the donor
- Donations made by companies which are recognised as public companies for tax purposes
- Donations cancelled within six months of the effective date
- Property disposed of under and in pursuance of any trust
- Donations between companies forming part of the same group of companies
- Reasonable bona fide contributions to the maintenance of individuals

Rates

Donations tax is payable at the end of the month following the month in which the donation was made at a flat rate of 20% on the first R30 million donations. Donations tax on the donations in excess of R30 million will be 25%. Only donation from 1 March 2018 will count towards the R30m threshold.

CRYPTO ASSETS

Crypto assets are regarded as a financial instruments for Income Tax purposes and not as a currency. As such the profit or loss on crypto asset trading could either be taxed as normal income if the intention of the investor was to speculate or alternatively the profit or loss could be regarded as a capital gain or loss if the intention of the investor was to hold it long-term as a capital investment.

For VAT purposes the exchange of crypto assets into South African Rand are regarded as an exempt supply.

CARBON TAX

Carbon tax became effective from 1 June 2019. The tax is being implemented in a phased manner, taking into account SA's NDC commitments to reduce greenhouse gas emissions. The first phase will be from 1 June 2019 to 31 December 2025, and the second phase from 2026 to 2030. This ensures alignment with our NDC commitments under the Paris Agreement.

The phased introduction of the carbon tax, through a relatively modest initial effective tax rate that will increase over time, provides a strong price signal to both producers and consumers to change their behaviour over the medium to long term and promote a systematic transition to a low-carbon economy by opening up new business opportunities and stimulating innovative business models.

The implementation of the carbon tax will be complemented by a package of tax incentives and revenue recycling measures to minimise the impact in the first phase of the policy (up to the year 2025).

RING-FENCING OF ASSESSED LOSSES

Assessed losses incurred by natural persons from trades could be ring-fenced, and might not be available for set-off against other income.

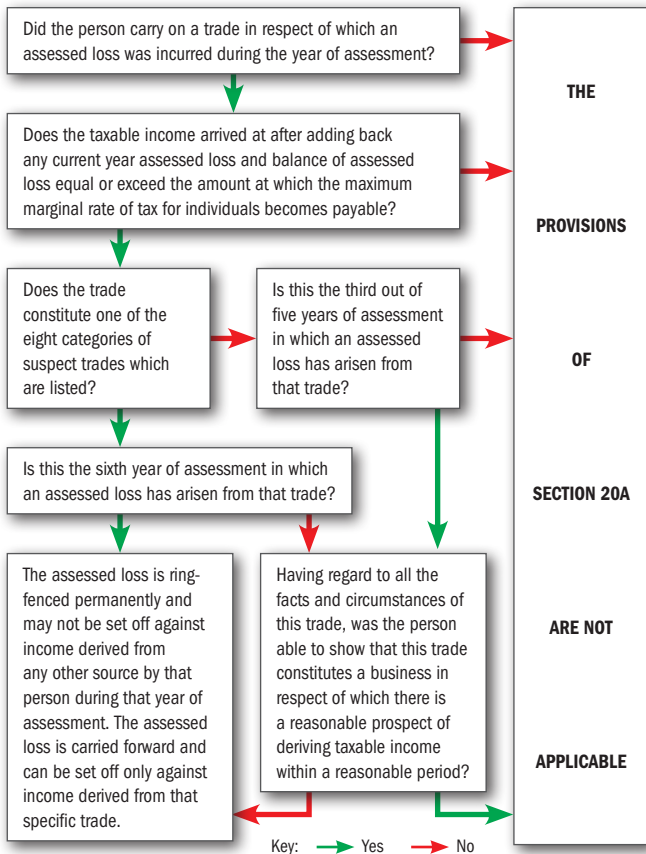

These restrictions apply to an individual whose taxable income is at the maximum marginal rate of tax, before setting off any assessed loss or balance of assessed loss.

For the restrictions to apply the person must have incurred an assessed loss from the secondary trade in at least three out of the last five years, or have carried on any of the following trades:

- any sport practised by that person or any relative
- any dealing in collectibles by that person or any relative
- the rental of residential accommodation, unless at least 80% of the residential accommodation is used by persons who are not relatives of that person for at least half of the year of assessment
- the rental of vehicles, aircraft or boats as defined in the Eighth Schedule, unless at least 80% of the vehicles, aircraft or boats are used by persons who are not relatives of that person for at least half of the year of assessment
- animal showing by that person or any relative
- farming or animal breeding, unless that person carries on farming, animal breeding or activities of a similar nature on a full-time basis
- any form of performing or creative arts practised by that person or any relative, or
- any form of gambling or betting practised by that person or any relative
- the acquisition or disposal of crypto assets

These provisions do not apply in respect of an assessed loss incurred by a person during any year of assessment from carrying on any trade as contemplated above, where that trade constitutes a business in respect of which there is a reasonable prospect of deriving taxable income (other than taxable capital gain) within a reasonable period. Where these losses have been incurred for at least six years out of the preceding ten years then such concession will not apply except for farming.

Checklist (flowchart) for the application of the ring-fencing provisions

Restraint of trade

Restraint of trade payments that are taxable in the hands of individuals, labour brokers and personal service providers are deductible by the payer over three years if the period of the restraint is less than three years, or over the period of the restraint if longer.

Leasehold improvements

Improvements made to leasehold property in terms of a lease agreement by the lessee must be included in the income of the lessor. Either the stipulated amount or a fair and reasonable value will be included.

The lessee may deduct such expenditure over the period of the lease. The lessor may be entitled to discount the value of the improvements over the period of the lease or 25 years, whichever is the shorter.

Pre-trade expenditure

Expenditure which would normally be deductible from income, actually incurred prior to the commencement and in connection with a specific trade, can be deducted from the income of that trade. The deduction is restricted to the income from that trade and may not be set off against the income from a different trade.

Research and Development

Research and development expenditure may qualify for incentive allowances whereby 150% of the operating expenses are deductible.

Certain requirements must, however, be met, including the Department of Science and Technology's approval of the deduction.

SUNDRY TAXES

Securities Transfer Tax

The tax is imposed at a rate of 0.25% on the transfer of listed or unlisted securities. No tax is payable on the original issue of shares. Securities consist of shares in companies or member's interests in close corporations.

Skills Development Levy

A Skills Development Levy is payable by employers at a rate of 1% of the total remuneration paid to employees. Employers paying annual remuneration of less than R500 000 are exempt from the payment of the levy.

Unemployment Insurance Fund Contributions

Unemployment Insurance Fund Contributions are payable monthly by employers on the basis of a contribution of 1% by employers and 1% by employees, based on employees' remuneration below R17 712 per month (R14 872 before 1 June 2021).

Employers not registered for PAYE or SDL purposes must pay the contributions to the Unemployment Insurance Commissioner.

EMPLOYMENT TAX INCENTIVE

The employment tax incentive was instituted in order to encourage employment creation for the youth (i.e. employees between the ages of 18 and 29 years) and the incentive will come to an end on 28 February 2029.

If an employer is eligible to receive the employment tax incentive in respect of a qualifying employee in respect of a month, that employer may reduce the employees' tax payable by that employer with the amount of the incentive.

The main requirements to qualify for this incentive are as follows:

- The taxpayer must be registered for the purposes of the withholding and payment of employees' tax

- The wage paid to an employee may not be less than the amount payable by virtue of a wage regulating measure applicable to that employer (i.e. a minimum wage) or if the amount of the wage payable to an employee is not subject to any wage regulating measure, the amount of R2 000 per month if the employee is employed for more than 160 hours in the month (if the employee is employed for less than 160 hours in a month and is paid remuneration in respect of those hours a percentage of R2 000 must be used)
- An employee is a qualifying employee if the employee:
 - ◆ is not an independent contractor
 - ◆ is not less than 18 years old and not more than 29 years old at the end of any month in respect of which the employment tax incentive is claimed
 - ◆ was not employed by the employer before 1 October 2013
 - ◆ is in possession of an identity card or is in possession of an asylum seeker permit
 - ◆ in relation to the employer, is not a connected person
 - ◆ is not a domestic worker
 - ◆ performs actual work in terms of a documented employment contract
 - ◆ is not mainly involved in studying
 - ◆ does not earn more than R6 500 (R6 000 before 1 March 2019) per month

The Minister of Finance designated special economic zones and industries in respect which an employer will also qualify for the incentive.

The amount of the employment tax incentive in respect of a qualifying employee is determined as follows:

- During each month of the first 12 months, 75% of the monthly remuneration of the employee if the employee's remuneration is less than R2 000, R1 500 (R1 000 before 1 March 2022) if the employee's remuneration is R2 000 or more but less than R4 500 and according to a formula if the employee's remuneration is R4 500 or more but less than R6 500.
- During each of the 12 months after the first 12 months that the same employer employs the qualifying employee, 37.5% of the monthly remuneration of the employee if the employee's remuneration is less than R2 000, R750 (R500 before 1 March 2022) if the employee's remuneration is R2 000 or more but less than R4 500 and according to a formula if the employee's remuneration is R4 500 or more but less than R6 500.

LEARNERSHIP ALLOWANCES

An annual and completion allowance of R40 000 may be claimed by the taxpayer for learnerships NQF qualifications from levels 1 to 6, and R20 000 for learnerships NQF qualifications from levels 7 to 10. The deduction claimable for disabled learners is R60 000 or R50 000 for both annual and completion allowances.

Where a learnership is terminated before a period of 12 full months the employer will be entitled to a pro rata portion of the annual allowance, regardless of the reason for the termination of the learnership. The completion allowance for a learnership of 24 months or more will be based on the number of consecutive 12 month periods completed \times the above annual allowance amount.

TRANSFER DUTY ON IMMOVABLE PROPERTY

- Calculated on the value of immovable property
- Payable within six months after the transaction is entered into
- Exemptions apply with the most notable when the seller is a VAT vendor
- Where a VAT vendor purchases property from a non-vendor, the notional input tax is calculated by multiplying the tax fraction (15/115 (14/114 before 1 April 2018)) by the lesser of the consideration paid or market value
- The acquisition of a contingent right in a trust that holds a residential property or the shares in a company or the member's interest in a close corporation, which owns residential property, comprising more than 50% of its assets, is subject to transfer duty at the applicable rate

Transfer duty is calculated as follows:

R0 – R1 000 000	0%
R1 000 001 – R1 375 000	3% of the value over R1 000 000
R1 375 001 – R1 925 000	R11 250 + 6% of the value over R1 375 000
R1 925 001 – R2 475 000	R44 250 + 8% of the value over R1 925 000
R2 475 001 – R11 000 000	R88 250 + 11% of the value over R2 475 000
R11 000 001 +	R1 026 000 + 13% of the value over R11 000 000

PENALTIES: ADMINISTRATIVE NON-COMPLIANCE

Administrative non-compliance penalties are penalties for the failure to keep proper records, failure to report reportable arrangements, non-compliance with a request for information, obstruction of SARS officials and failure to comply with tax obligations. The following non-compliance penalties could be charged:

- Fixed amount penalties (this penalty increases monthly, calculated from one month after the penalty assessment)
- Percentage based penalties
- Understatement penalties

Fixed amount penalties

Fixed rate penalties can be imposed by SARS for non-compliance with any procedural or administrative action or duty imposed or requested, for example:

- Not registering when required to
- Not informing SARS where there is a change in registration details
- Not filing returns
- Not retaining records as required by SARS

The fixed rate penalty does not apply where the percentage base penalty or understatement penalty applies.

Fixed rate penalties can be imposed as per the following table:

Assessed Loss or taxable income for preceding year	Monthly penalty
Assessed loss	R250
R0 - R250 000	R250
R250 001 - R500 000	R500
R500 001 - R1 000 000	R1 000
R1 000 001 - R5 000 000	R2 000
R5 000 001 - R10 000 000	R4 000
R10 000 001 - R50 000 000	R8 000
R50 000 000 +	R16 000

Percentage based penalties

The percentage based penalty is imposed where SARS is satisfied that the taxpayer has not paid the tax as and when required under a Tax Act. This penalty is equal to a percentage of the tax not paid. The following percentage based penalties will be imposed:

Tax type	Penalty percentage
Income tax	10% under certain circumstances (i.e. sec 35A)
Provisional tax	<ul style="list-style-type: none">■ 10% on the late or non-payment of provisional tax■ 20% if provisional tax estimate has been understated (the non-submission of the return within four months after year-end is deemed to be a submission with an estimate of Rzero)
Employers' and employees' tax	<ul style="list-style-type: none">■ 10% if return has not been filed■ 10% if employee tax and/or UIF has not been paid■ 10% if fringe benefits have not been indicated on employee's tax certificates
Value-Added Tax	10% on the late payment of VAT

Understatement penalties

The understatement penalty is a percentage in accordance with the table set out below and is applied to the shortfall of the tax. It applies to all taxes and could be charged when there is a default in rendering a return, an omission from a return, an incorrect statement in a return and, if no return is required, the failure to pay the correct amount of tax. Excluded from the understatement penalties are penalties resulting from a "bona fide inadvertent error".

The following definitions relate to the understatement table below:

- **Substantial understatement** means a case where the prejudice to SARS or the fiscus exceeds the greater of 5% of the amount of 'tax' properly chargeable or refundable under a Tax Act for the relevant tax period, or R1 000 000
- **Repeat case** means a second or further case of any of the behaviours listed under the table above within five years of the previous case

- **Reasonable care not taken** means that a taxpayer is required to take the degree of care that a reasonable, ordinary person in the circumstances of the taxpayer would take to fulfill his or her tax obligations
- **No reasonable grounds for the tax position** would occur when the taxpayer does not have a reasonably arguable position. A taxpayer's interpretation of the application of the law is reasonably arguable if, having regard to the relevant authorities, for example an income tax law, a court decision or a general ruling, it would be concluded that what is being argued by the taxpayer is at least as likely as not, correct
- **Impermissible avoidance arrangement** means an arrangement as defined in the General Anti-Avoidance Rules in the Income Tax Act
- **Gross negligence** means doing or not doing something in a way that, in all the circumstances, suggests or implies complete or a high level of disregard for the consequences. Gross negligence involves recklessness but does not require an element of wrongful intent or "guilty mind", or intent to breach a tax obligation
- **Intentional tax evasion** is a willful act that exists when a person's conduct is meant to disobey or wholly disregard a known legal obligation. Knowledge of illegality is crucial

Behaviour	Standard case	Obstructive or repeat case	Voluntary disclosure after audit notification	Voluntary disclosure before audit notification
Substantial understatement	10%	20%	5%	0%
Reasonable care not taken in completing return	25%	50%	15%	0%
No reasonable grounds for tax position	50%	75%	25%	0%
Impermissible avoidance arrangement	75%	100%	35%	0%
Gross negligence	100%	125%	50%	5%
Intentional tax evasion	150%	200%	75%	10%
